APPROBATION*	

Description

LOCTITE® 5127 is a blue methacrylate ester acrylic paste which improves flange-sealing reliability. After curing between mating metal flanges, it provides a tough, resilient, solvent and temperature resistant seal that flexes with flange movements caused by vibration, pressurization or thermal changes. Typical applications include making gaskets for pumps, housings, axle covers, etc.

Avantages

Overcomes the shortcomings of pre-cut and other formed-in-place chemical gaskets. Provides a tough, resilient, solvent and temperature resistant seal. Flexes with flange movements caused by vibration, pressurization or thermal changes. Can be used instead of conventional gaskets. Can also be used to repair damaged conventional gaskets or as a coating/dressing for conventional gaskets.

Caractéristiques

Methacrylate ester acrylic paste which improves flange-sealing reliability. It provides a tough, resilient, solvent and temperature resistant seal.

PRODUCT FEATURES

Brand	LOCTITE
N° Ean13	4058093008355
Weight	380 g
Packaging	1
